DETAILED ACTION

This office action is in response to the amendment and arguments filed February 21, 2006. In accordance with the amendment, claims 7, 8, and 15 are amended. Claims 28 and 29 are further formally canceled by Examiner's Amendment (attached).

Claims 1-27 are pending.

Allowable Subject Matter

1. Claims 1-27 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest, in combination, each specific element as claimed in independent claims 1, 16, and 27. The closest prior art of record (Williams H1791; Yao U.S.P. No. 5,917,179) does not teach or reasonably suggest the optical apparatus as claimed, and further which Stokes light is generated by a *second* stimulated Brillouin scattering medium and is coupled/seeded to a first stimulated Brillouin medium in order to provide the Stokes light waves to the first stimulated Brillouin scattering medium. The arguments filed February 21, 2006 are persuasive as to the patentability of the claimed invention in view of the closest prior art cited by the Examiner (see rejection mailed December 7, 2005).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see response with arguments filed February 21, 2006, with respect to the rejections to the Williams H1791 and Yao U.S.P. No. 5,917,179 references, have

been fully considered and are persuasive. The rejections of claims 1, 2, 6-12, 16-18, and 21-27 have been withdrawn. A refresh search has provided no prior art to reject claims 1-27 as they currently stand.
